# BRAIN INJURY RECOVERY

Recovering from a brain injury can be daunting, especially with visual disturbances affecting up to 90% of patients. Vision therapy, however, offers promising results, with approximately 80% of individuals experiencing improved visual function.

## WHAT CAN LEAD TO A BRAIN INJURY?

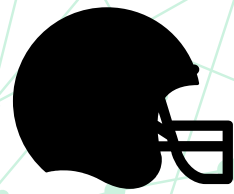

Military activities  
Gun shot wounds  
Explosive blasts

Stroke  
High Blood Pressure  
Diabetes

Automobile accidents

Extreme sports &  
recreational  
activities

## HOW DOES VISION THERAPY HELP WITH MY RECOVERY?

By targeting specific deficits like visual acuity and depth perception, vision therapy accelerates rehabilitation, enhancing recovery outcomes significantly.
